International Cement Microscopy Association

**Proceedings of the Fifth Annual International Conference On Cement Microscopy
March 14-17, 1983
Nashville, Tennessee USA**

Title: Improvements in Samples Preparation Technique for Microscopic Analysis of Clinker and Related Materials

Authors: Ahmed, W. U.

pp. 1-10

Title: Electron-Optical Studies of Stabilized alpha prime and beta-Dicalcium Silicate

Authors: Chopra, S.; Ghose, A.; Young, J. F.

pp. 11-22

Title: A Study on the Interrel. Between the Bulk Density of Port. Cem. Clinker and Its Hydr. Properties by Means of Direct-Light Microscop

Authors: Janko, A.

pp. 23-35

Title: Nigerian Portland Cement Clinker Characterization by Reflected Light Microscopy

Authors: Sarkar, S. L.

pp. 36-47

Title: Normal Setting of Portland Cement Containing Phosphogypsum

Authors: Bensted, J.

pp. 48-61

Title: Deleterious Raw Materials and Their Effects on Clinker Burnability -- Panel Discussion

Authors: Long, G. R.

pp. 63

Title: Separate Grinding of a Hard Silicious Material and Other Raw Components -- Panel Discussion

Authors: Chen, H.

pp. 64

Title: Workshop on Deleterious Raw Materials and How They Affect Clinker Quality -- Panel Discussion

Authors: Young, R.

pp. 65

Title: Things Petrographic Examination Can and Cannot Do with Concrete

Authors: Ray, J. A.

pp. 66-85

Title: The Use of Mineralisers to Produce High Strength Cement

Authors: Long, G. R.

pp. 86-98

Title: Assessment of Process Effects on Clinker Microstructure Through its Quantification

Authors: Hargave; Venkateswaran; Chatterjee; Rangnekar

pp. 98-120

Title: Microscopic Examination of Clinker Produced by the Wet and Dry Process

Authors: O'Kelly, B. M.; Fortune, J.

pp. 121-131

Title: Influence of Chemistry and Microstructure on Portland Cement Clinker Grindability

Authors: Buchanan, C. E. Jr.; Bayles, H. J.

pp. 132-145

Title: Effect of Coal Firing Systems on Clinker Quality

Authors: Hansen, E. R.

pp. 146-149

Title: Physiochemical and Microstructural Characteristics of the Hardened Alite Pastes

Authors: Abo-El-Enein, S. A.

pp. 150-163

Title: Microstructural Study of a 135 Mpa (19500 psi) Ready Mix Concrete

Authors: Aitcin, P. C.; Regourd, M.; Bedard, C.

pp. 164-179

Title: Investigation of the Shale Brick Cement-Lime Mortar Bond Using SEM

Authors: Marusin, S. L.

pp. 180-188

Title: Micro. Exam. and Analyses for the Diagnoses of Damage Structure and the Restoration of Structures (Concr. Weather. of Natural Stone)

Authors: Romer, B.

pp. 189-203

Title: The Petrographic Examination of an Unusual Texture in Some Failed Concrete Piles
Authors: St. John, D. A.
pp. 204-215

Title: Internal Microcracking: Types, Causes, and Their Effect on the Behavior of Concrete
Authors: Carrasquillo, R. L.
pp. 216-230

Title: The Influence of Mixing Temperature on Air Content of Hardened Concrete
Authors: Gay, F. T.
pp. 231-239

Title: Coal Firing
Authors: Hansen, E.
pp. 241-246

Title: Use of Selective Dissolution and X-Ray Diffraction to Determine Form of Tricalcium Aluminate in Portland Cement
Authors: Burkes, J. P.; Buck, A. D.
pp. 247-251

Title: A Method for the Quantitative Determination of Alpha Quartz in Coal Ash by X-Ray Diffraction
Authors: Barger, C. S.
pp. 252-260

Title: X-Ray Diffraction Analysis of Portland Cement and Related Materials - A Q. C. Tool at Southwestern Portland Cement Co. for 12 Years
Authors: Adams, L. D.
pp. 261-270
