International Cement Microscopy Association

**Proceedings of the Thirteenth Annual International
Conference On Cement Microscopy
April 8-11, 1991
Tampa, Florida USA**

Title: Replacement of Silica by Sandstone in a Raw Meal-Its Effect on Clinker Microstructure

Author: Sarkar, S. L.; Tagnit-Hamou, A.

pp. 1-16

Title: Advances in Sample Preparation For Clinker and Concrete Microscopy

Author: Ahmed, W. U.

pp. 17-29

Title: Rapid Estimation of 28-Day Compressive Strength of Clinker by Optical Microscopy

Author: Sinha, S. K.; Rao L. H.; Akhouri, P. K.

pp. 30-37

Title: Quantitative Clinker XRD Analysis - A Tool for Process Optimization and Cement Quality Control

Author: Beilmann, R.; Bruggemann, H.

pp. 38-59

Title: Application of Microstructural Parameters to The Grindability Prediction of Industrial Clinkers

Author: Venkateswaran, D.; Gore, V. K.

pp. 60-70

Title: Microstructure of High Purity High Alumina Cement Clinkers and Its Effect on Cement Properties

Author: Venkateswaran, D.; Narayanan, I.; Chakraborty, I. N.; Biswas, S. K.

pp. 71-85

Title: Investigation of Fly Ash Characteristics and Behaviors for Use in Extended Oil Well Cements

Author: Reeves, N. K.

pp. 86-100

Title: Application of Image Analysis to a Comparison of Ball Mill and High Pressure Roller Mill Ground Cement

Author: Bohen, D.; Diamond, S.

pp. 101-119

Title: Characterization of Reducing Environment in Portland Cement by Microscopy

Author: Centurione, S. L.

pp. 120-130

Title: Hydrogarnet-Gehlenite Hydrate Equilibrium in Glass Cements

Author: MacDowell, J. F.; Sorrentino, F.; Capelle, M.

pp. 131-146

Title: Cracking of Mortar and Development of Durable Mortar Matrix for Sculptural Work - A Case Study

Author: Coleman, S. E.

pp. 147-159

Title: Microstructural Study of Clinkers From Two Types of Kilns using the Same Raw Materials

Author: Tagnit-Hamou, A.; Sarkar, S. L.

pp. 160-176

Title: Cement Component Identification Using Microscopy

Author: Caveny, W. J.

pp. 177-190

Title: Microstructure of Early Hydrated Alite Pastes

Author: Hanafi, S.

pp. 191-198

Title: The Development of an Ono Microscopy Program - A Plant Case History

Author: McKenzie, L. A.

pp. 199-212

Title: Mortar and Concrete with Latex Admixtures - Case Studies of Bond Failures

Author: Marusin, S. L.

pp. 213-223

Title: A Study of The Hydration And Strength of Interground and Blended Chinese Cements at Early Ages

Author: Barker, A. P.

pp. 224-243

Title: Waste Solidification and Fixation: A Guide to Microscopical Evaluation

Author: Hills, L. M.

pp. 244-253

Title: Heat-Flow Calorimetry in Cement Chemistry - Construction and Application of a Low Cost High Sensitive Calorimeter

Author: Pollman, H; Kuzel, H.-J; Meyer, H. W.

pp. 254-272

Title: The Microcrystalline Morphology of Portland Cement Mixes Containing Limestone Filler

Author: Orr, D. M. F.; Slattery, O. P.

pp. 273-280

Title: Thin Section Identification of Various Admixtures and their Effects on the Cement Paste Morphology in Hardened Concrete

Author: Randolph, J. L.

pp. 281-293

Title: Hydration Kinetics and Microstructure of Low Porosity Slag - Lime Pastes

Author: Hanafi, S.

pp. 294-303

Title: Investigations of Mortars From Medieval Brick Buildings in Germany

Author: Middendorf, B.; Knofel, D.

pp. 304-323

Title: Hydraulic Reactivity and Microstructure of Hardened Portland Cement Pastes of Various Porosities

Author: Babaqi, A; Abo-El-Enein, S. A.; El-Didamony, H.; Khalil, Kh. A.

pp. 324-335

Title: Determination of Portland Cement Clinker Phase Abundance by Backscattered Electron and Energy Disperse X-Ray Imaging

Author: Stutzman, P; Odler, I.

pp. 335-346
