

**icma**

International Cement Microscopy Association

**Proceedings of the Seventeenth Annual International  
Conference On Cement Microscopy  
April 23-27, 1995  
Calgary, Alberta, Canada**

---

**Title:** Research on the Morphology of Cement Hydrates  
**Author:** Wang Peiming, Li Pingjiang and Chen Zhiyuan  
**pp.** 1-7

**Title:** Correspondence Between Plant Clinker and Laboratory Clinker  
**Author:** M.R. Sanyal, S.K. Bandopadhyay, Vidyarthi, S.N. Ghosh  
**pp.** 8-17

**Title:** Case Studies of Discolored Surfaces of Various Building Material Exposed to Weather  
**Author:** Stella L. Marusin  
**pp.** 18-28

**Title:** Effects of Cement Kiln Dust Insufflation and High Kiln Temperature Determined by Reflected Light Microscopy  
**Author:** Francis C. Hoodmaker, Benjamin J. Franklin  
**pp.** 29-37

**Title:** Microstructure of High Strength and High Performance Concrete  
**Author:** A. Grodzicka, W. Nocun-Wczelik and B. Trybalska  
**pp.** 38-47

**Title:** Microscopic Analysis of Cement/Chemical Admixture Incompatibility  
**Author:** Stephen Dymso, Jean L. Randolph and Shondeep L. Sarkar  
**pp.** 47-60

**Title:** Kinetics of Formation and Fine Textures of Alite in Portland Cement Clinker  
**Author:** I. Maki, H. Kamei, M. Nakura and Y. Mizuno  
**pp.** 61-70

**Title:** Procedures for Quantitative X-Ray Diffraction  
**Author:** G. Patino, A. Viveros and M.I. Avila  
**pp.** 71-82

**Title:** The Effects of Clinker Burning Temperature on the Degree of Belite Clustering  
**Author:** Walter W. Rowe  
**pp.** 83-93

**Title:** Observing Three Dimensional Microscopic Structures Using Multiple Optical-Microscopic Images  
**Author:** Kazufumi Kaneda, Nobuhiro Irie, Hiroyuki Fujii, Hideo Yamashita, Ei-ichi Tazawa, and Kenji Kawai  
**pp.** 94-101

**Title:** Characteristic Morphologies of The Interface Between Cement Paste and Fly Ash  
**Author:** Wang Peiming, H. Scholz and Chenn Zhiyuan  
**pp.** 102-109

**Title:** Effect of Mixing Water on Morphology of C3A Hydrates  
**Author:** Ei-ichi Tazawa, Kenji Kawai and Masaya Harada  
**pp.** 110-118

**Title:** The Influence of Microstructure in Clinker and Cement on Setting Time and Strength Development Until 28 Days  
**Author:** Ketil Svinning and Sigrun K. Bremseth  
**pp.** 119-138

**Title:** Insufflating Shredded Tires as a Supplemental Fuel Source  
**Author:** Matt Clarage, Tom Zmudka, Bob Hadley, Bob Jasper, Jr..  
**pp.** 139-149

**Title:** Microstructure and Reactivity of Natural Pozzolans Fly Ash and Blast Furnace Slag  
**Author:** Caijun Shi and Robert L. Day  
**pp.** 150-161

**Title:** Improvements in XRD Analysis of Clinker Silicate Phases  
**Author:** Alberto Saini, Nicoletta Giuliani  
**pp.** 162-181

**Title:** Microscopical Study of Coal - Cement Paste Interface  
**Author:** Bill Caveny  
**pp.** 182-191

**Title:** Petrographic Analysis of a 100-Plus-Year-Old Sidewalk  
**Author:** Edward F. O'Neil and J. Pete Burkes  
**pp.** 192-210

**Title:** Microscopical Analysis of Cement to Formation Bond Quality Associated with Oil Well Blends used in the Sabine Uplift

**Author:** Tom Dealy, Steve Johnson

**pp.** 211-219

**Title:** Phases of Cement Paste, Cured in High Temperature - CO<sub>2</sub> Environment

**Author:** Bill Caveny, Gant McPherson, Lance Brothers and Sudhir Mehta

**pp.** 220-231

**Title:** The Influence of Burning Conditions on Alite Crystalline Characteristics

**Author:** Sergio Luiz Centurione and Marcelo Tonhi

**pp.** 232-241

**Title:** Microstructural Studies of Alkali-Silica Reaction in Fly Ash Concrete

**Author:** MDA Thomas

**pp.** 242-256

**Title:** Effects of Amorphous and Crystalline Silica on Phase Chemistry, Microstructure and Strength of Set Cement at Elevated Temperatures

**Author:** S. Mehta and R. Jones, J. Chatterji and G. McPherson

**pp.** 257-270

**Title:** Microscopic Observation of Cracks in Concrete - Sample Preparation Technique Using Dye Impregnation

**Author:** H. Hornain, J. Marchand, A. Ammouche, J.P. Commene and Moranville

**pp.** 271-282

**Title:** The Influence of Microsilica on the Properties of Concrete Microstructure Produced by a New Mixing Technique

**Author:** H. Al-Nageim, A. Tamimi, K. Vaughan, R. Lewis

**pp.** 283-292

**Title:** Mechanical Strength and Grindability of Portland Clinkers with Different Mineralogical Characteristics

**Author:** Valdir A. Zampieri and Flavio A. C. Munhoz

**pp.** 293-310

**Title:** Petrographic Analysis of a Concrete Mortar Mixed Onboard a Recent Space Shuttle Endeavor Mission

**Author:** R.C. First and L. Kovach

**pp.** 311-329

**Title:** Petrographic Thin-Section and Scanning Electron Microscope Analysis of a Mortar Fabricated in a Microgravity Environment

**Author:** P.T. Miller, S.A. Farrington, and L. Kovach

**pp.** 330-343

**Title:** The Influence of Clinker Microstructure on Grindability  
**Author:** Linda M. Hills  
**pp.** 344-352

**Title:** The ICMA Sample Exchange Program: Historical Review and Evaluation  
**Author:** Ella Shkolnik and Linda M. Hills  
**pp.** 353-368

**Title:** Characterization and Potential Use of Ash From Waste Water Treatment Plant Incinerator  
in Concrete  
**Author:** Arezki Tagnit-Hamou and Basile Tamtsia Tamboue  
**pp.** 369-388

**Title:** The Microscope: A Method and Tool to Study Lime Burning and Lime Quality  
**Author:** Lynn A. McKenzie  
**pp.** 389-401

**Title:** Lime Particle Size: Its Effects on Feed and Products of a Hydrator Circuit  
**Author:** Lynn A. McKenzie  
**pp.** 402-423
